**IMPROVED
INSIGHTS**

STREAMLINE SECURITY INCIDENT MANAGEMENT AND COMMUNICATIONS

Securing corporate buildings can take a lot of time and manpower, especially for larger facilities. During critical moments, security personnel do not have time to sift through important documents or run around to dispatch the correct teams. Simplify your security operations with one, easy-to-use platform. Ally allows you to manage incident records and dispatch, communicate instantly across devices, and make proactive planning decisions.

ALLY FEATURES

1. Save time by quickly switching back and forth from dispatch, records, and reports using Ally's intuitive layout and navigation.
2. Create new incident records or edit existing records from any web-enabled device using an internet connection.
3. Use integrated mapping capabilities to enhance decision-making through embedded analytics and reports for fast trend analysis, proactive security planning, and reduced liability.
4. Consolidate your storage by uploading an unlimited number of images, documents, audio files, and video files to any incident or daily activity report.
5. Reduce the possibility of duplicate records and increase data integrity by easily connecting incident, name, and vehicle records together.

ALLY IN ACTION

REAL-TIME SITUATIONAL AWARENESS

An employee notices an abandoned vehicle in the company parking lot and calls security.

A security employee runs the license plate through the Ally database and discovers that the vehicle belongs to a former employee with prior incidents on record.

The security employee calls a tow truck to remove the vehicle and includes a warning flag in the software about the former employee.

ENHANCED DECISION-MAKING

An employee stumbles on a large crack in the sidewalk and bloodies his hand when he catches himself. He reports the incident to security.

Security personnel log the incident into Ally.

When management runs a periodic incident report, they can clearly see using Ally's map-based analytics features that this wasn't the first fall in that specific location.

Steps are then quickly taken to repair the sidewalk to prevent additional injuries and liability issues.
